EDUCATION

Technion - Israel institute of technology

Haifa, Israel

B.Sc. in Information Systems Engineering

Expected Graduation, April 2028

- o **Related Coursework:** Intro in Computer Science(89), Software Engineering(91), Computer Architecture & Operating Sys.(89), Intro in Data Analysis(87),Databases management(81),statistics 1(83).
- o **Related courses currently studying:** machine learning 1, intro in game theory, data structures and algorithms, deterministic models in operations research.

Ort sallama High School

Sallama

Gifted Class Student

2016-2022

EXPERIENCE

Technion Formula Student Team

Haifa, Israel

Autonomous Systems software integration & Web Development

Nov 2025 – present

Develop and maintain the team's website, improving accessibility and content management for team members and sponsors.

- Integrated autonomous sub-team software modules into a unified framework, enabling reliable communication between perception, mapping, planning, and control components.
- Collaborate with cross-functional autonomous sub-teams to support end-to-end system integration and debugging.

EOP Technion - Equal Opportunities Project

Haifa, Israel

Social Mentor

Sep 2024 – present

- Assist first-year Arab students with a smooth acclimatization process at the Technion.
- Help the students manage their time.

FIRST Robotics Team 1574 (FRC)

Misgav, Israel

Member of the Programming and Electronics Team

Dec 2021 – May 2022

- Worked on organizing the electronic & control system of the robot.
- designed pneumatic solutions for robot mechanics.
- Israel Championship Finalist and attended the World Championship in Houston, Texas.

FIRST Robotics Team 11808 (FTC)

Misgav, Israel

Programming Team Lead

Sep 2019 – May 2021

- Trained and managed the programming team to develop software for autonomous and teleoperated control.
- Developed a Java + SQLite data-collection system and analyzed performance metrics across 20+ robotics teams to support data-driven match strategy decisions.
- Winner of the Israel Championship and attended the World Championship in Detroit, Michigan.

PROJECTS

Appointment-making WebApp for a Barbershop

Nov 2024 – present

- Built a WebApp cloud-backed appointment scheduling system using Flutter and Firebase, supporting concurrent users with real-time updates and authentication.
- The application is actively used by a local business to manage customer appointments

Rental Management & Analytics System (Django, SQL)

Database management course project

- Designed and queried a relational database with multiple entities and foreign-key relationships
- Implemented SQL queries and views involving joins, aggregation, and constraint-based logic
- Developed data insertion forms, search and analytical features to compute statistics over relational data

SKILLS

Programming: Java, Python, C, Dart, SQL.

Frameworks and Libraries: Flutter, pandas, numpy, cvxpy for linear programming, ROS2, django.

Tools: Android Studio, IntelliJ, PyCharm, Jupyter Notebooks, Git.

Skills: Data visualizations, Statistics (hypothesis testing), data-driven analytics, OOP in Java.

Languages

Arabic: Native Speaker | **Hebrew:** Proficient | **English:** Proficient | **German:** Basic (understand and use simple phrases).
